THE CONCEPT

WHAT IS THE CLEAN AIR BUBBLE? (IN SIMPLE TERMS)

Think of it as a "Fresh Air Window" — one that filters out 100% of pollution before it enters.

The Y-CAB unit draws outdoor air through a duct in your wall, filters it through hospital-grade media, then pumps clean air in at slight positive pressure. This "bubble" pushes polluted air OUT — pollution cannot enter. Unlike room purifiers that recycle stale air, YOGa solves PM2.5 AND CO2 buildup simultaneously.

ADVANTAGE

WHY YOGa OUTPERFORMS EVERY ROOM PURIFIER IN STORES OR ON AMAZON

Fresh Outdoor Air, Not Recycled Stale Air

Room purifiers endlessly recirculate the same stale indoor air. YOGa continuously brings in fresh filtered outdoor air — solving both PM2.5 and CO2 buildup simultaneously.

Whole Space — Not Just One Room

A single Y-CAB covers 1,500 sq.ft — your entire home, school floor or clinic. Every room breathes clean, not just the one with a purifier sitting in the corner.

IIT Delhi Validated — Real Indian Data

Independent IIT Delhi studies confirmed results in real Indian spaces. Golf Links: 2.82 g/m³ indoor vs 561 outside — a verified 99.5% reduction, not a lab claim.

Filters Available for 20+ Years

YOGa guarantees parts and filters for 20+ years. Most consumer purifiers are obsolete in 2 years when filters go out of production and you must replace the whole unit.

HEALTH IMPACT

WHY CLEAN AIR IS THE MOST IMPORTANT THING YOU CAN DO FOR YOUR HEALTH

We breathe 20,000 times a day — air is the most consumed substance in the human body.

Health-conscious people choose organic food and filtered water. Clean air is the most impactful and most overlooked upgrade. If you care about what you eat and drink, air matters even more — and it shows in your energy, sleep and long-term health.

Asthma Patients

Clients report fewer night attacks and dramatically better sleep within weeks. Clean air removes every

Pulmonary Fibrosis

Every breath of polluted air causes irreversible lung scarring. A trigger-free space protects remaining lung

Allergy & Sinus Sufferers

Pollen, dust mites, mold and pet dander removed from your entire space continuously. Many clients stop

Health-Conscious Individuals

Elite athletes and longevity-focused families choose clean air as their most powerful daily upgrade. Air is the
